

MONSOON FLOOD 2025

SITUATION REPORT 15

15 September, 2025

HIGHLIGHTS

Severe flooding triggered by intense monsoon rains and high river flows has caused a major humanitarian crisis in Pakistan, particularly in Punjab and Sindh. Punjab is facing its worst flood in history, with over 4.2 million people affected, 4,700 villages submerged, and more than 2 million evacuated. The disaster has led to widespread damage to crops, livestock, homes, and infrastructure. Floodwaters are now moving into Sindh, where high alerts are in place at Guddu, Sukkur, and Kotri barrages. Authorities expect flows over 800,000 cusecs, and around 120,000 people have been evacuated from vulnerable riverine areas.

From 15 to 19 September, rain-thunderstorms are forecast in Khyber Pakhtunkhwa, Azad Jammu and Kashmir, Gilgit-Baltistan, and parts of Punjab and Islamabad, with isolated heavy falls expected. Meanwhile, Sindh and Balochistan will remain mostly dry. The situation remains critical, with ongoing relief efforts and heightened risk from further rainfall.

ESSENTIAL NEEDS

Flood-affected communities across Punjab, Khyber Pakhtunkhwa (KPK), and Gilgit-Baltistan (GB) are in urgent need of humanitarian assistance. In Punjab, riverine flooding has left families requiring food supplies, clean drinking water, hygiene kits, dignity kits, mosquito nets, tents, and other NFIs.

In KPK, displaced households need hygiene kits, kitchen sets, folding beds, water tanks, and jerry cans to meet basic survival needs. In GB, priority requirements include food items, hygiene and dignity kits, and safe drinking water. Immediate relief support is critical to safeguard the health, dignity, and well-being of millions affected by the ongoing disaster.

Note

Alkhidmat Foundation Pakistan Disaster Management is closely monitoring the ongoing monsoon and flood situation on an emergency basis. The team is actively assessing conditions, identifying vulnerable areas, and coordinating preparedness and response measures to ensure timely relief. By mobilizing resources and planning effective interventions, Alkhidmat aims to support Flood-Affected families, safeguard lives, reduce vulnerabilities, and minimize further risks.
